Dear Nabil Osman

Subject: Abstract Letter - Project on SomCoffee& Restaurant

I am writing to provide an overview of a project focused on developing an *SomCoffee& Restaurant*, a static page refers to a web page that displays fixed content and does not change dynamically based on user input or real-time data.

Static pages in a *SomCoffee& Restaurant* can serve various purposes, including:

1. Home Page: The home page of the system can be a static page that provides an overview of the restaurant's information, such as its name, logo, contact details, and operating hours. It may also include links to other sections of the system, such as menu, and reservations.

2. Menu Page: This page displays the restaurant's menu items, including descriptions, prices, and any special offers or promotions.

3. Order Page: Users can place orders through this page by selecting menu items, specifying quantities, and adding any special instructions.

4. Reservation Page: If the restaurant accepts reservations, this page allows users to reserve a table by providing their preferred date, time, and party size.

5. Inventory Page: This page provides information about the restaurant's inventory, including stock levels, ingredients, and any low or out-of-stock items.

6. Staff Page: This page is dedicated to managing staff members, including their roles, schedules, and contact information.

7. About Us Page: This page provides information about the restaurant, its history, mission, and values.

9. Contact Us Page: Users can find contact information, such as phone number, email address, and physical address, on this page. It may also include a contact form for inquiries or feedback.

Static pages in a *SomCoffee& Restaurant* provide essential information and serve as a reference for customers. While they do not change dynamically, they play a crucial role in presenting consistent and relevant content to users.

Timeline:

The project is expected to be completed within [Dec 2023]. This timeline includes Home Page, About Us, Contact Us, Menu, integration and testing, as well as training.

We believe that the implementation of these Static pages in a ***SomCoffee& Restaurant*** will significantly improve operational efficiency, streamline order processing, and enhance customer satisfaction. We are confident that the project will contribute to the success of our organization and align with our strategic goals.

Thank you for considering this project. Should you require any additional information or have any questions, please do not hesitate to reach out.

Sincerely,

Nor Mohamed Hussein
